ABSTRACT OF THE DISCLOSURE

	3	A method and device monitor	or usage of external storage media	. The method and system
	4	selectively shadow I/O (input/outp	put) from/to only external stora	ge media. The method
	5	selectively shadows only accesses	to external storage media conne	cted to a computer. The
	6	method detects a data access to an o	external storage medium and writ	es a copy of the accessed
	7	data to a storage location other than	the external storage medium. In or	ne embodiment, the access
	8	is a write operation. In one embodin	nent, the method intercepts an I/O	request from the computer
	9	to an external storage media drive in	which the external storage media	is inserted. In the case of
10	10	the Windows NT or Windows 2000	operating systems, the intercepted	I/O requests are preferably
,	11	IRP_MJ_CREATE, IRP	_MJ_WRITE, IRP_M	J_CLOSE and
	11 12	IRP_MJ_CREATE, IRP IRP_MJ_FILE_SYSTEM_CONTR		_
]			OL packets. An apparatus compris	ses a detector and a storage
1	12	IRP_MJ_FILE_SYSTEM_CONTR	OL packets. An apparatus comprisetor receives I/O requests to an exte	ses a detector and a storage rnal storage medium. The
